TED SCHWINDEN
GOVERNOR

Fellow Montanans:

Montana's agricultural heritage contributes something very special to our lifestyle and values. Agriculture is, and will continue to be, a vital part of our state's economy. From the farm to the table, agriculture is still America's largest employer.

Increasingly, today's agriculture is becoming a complex business, one that requires sophisticated management, marketing and investment decisions. The 1984-85 Montana Agricultural Statistics Bulletin provides sound information that I hope you find useful in making the many business decisions that confront those of us in agriculture.

Sincerely,

TED SCHWINDEN
Governor

MESSAGE FROM THE DIRECTOR

During the past several years agriculture in Montana has seen a downturn in production due to drought conditions, coupled with a depressed economic condition which has harshly impacted many farmers and ranchers in the state. The health of Montana's economy has become highly dependent on the status of its agricultural sector. For example, Montana's agricultural income in 1931 was a little more than \$64 million compared with \$1.4 billion in 1985 an increase of 22 times. Although, from 1984 to 1985 total farm income decreased by 14 percent. This alone indicates that as Montana's agricultural economic health goes, so does the economic health of the entire state. This has been shown by the vast slowdown in the states economy over the past few years.

The ever changing economic and climatic factors affecting our agricultural industry have made it necessary for producers and agriculturally related businesses to have pertinent information and accurate statistics available for use. It is my hope that you will find the 1984-85 Montana Statistical Bulletin informative and useful in your decision making process regarding Montana's number one industry.

Sincerely,

Keith Kelly
Keith Kelly
Director

THE MONTANA DEPARTMENT OF AGRICULTURE

Prior to a major reorganization in 1977 the Department of Agriculture functioned mainly as a regulatory agency. Restructuring enabled the department to perform its regulatory responsibilities more efficiently and to enhance its duties to promote and encourage agriculture in Montana. The reorganization plan called for the department to enter the 80s with a posture of progressively serving Montana agriculture.

The Department Director is responsible for administration of the department's \$4.5 million annual budget and its 77 full time and 15 seasonal employees. He oversees the department's four divisions and two units. The function of each division and unit is summarized below.

The Centralized Services Division performs technical fiscal and administrative support functions for the department. Responsibilities of the division include activities for internal operations of the department.

The Environmental Management Division is responsible for the registration of 4,000 pesticide products; the certification and licensing of 2,500 commercial applicators and dealers, and some 10,000 private applicators; enforcement of the pesticide act and rules; providing technical environmental services to agriculture; providing an evaluation of pest management problems and programs; and providing analytical laboratory and consultative services to other agencies and the public.

The Plant Industry Division is responsible for the administration and enforcement of regulatory laws controlling the production, manufacturing and marketing of agricultural commodities exported from or distributed within Montana. The division investigates consumer complaints; performs technical inspections and surveys; issues federal-state grade certificates; and provides regulatory technical expertise and licenses for 5,200 bee yards, 550 nurseries, 650 feed dealers, 350 fertilizer dealers, 300 seed dealers, and 325 grain merchandisers. The division also registers some 3,300 commercial feed products and 1,000 fertilizers. The division's grain laboratory in Great Falls provides the only official grain grading services in the State.

The Agricultural Development Division is responsible for administering programs directed at promoting and enhancing Montana agriculture. The Beginning Farm Loan Program and Rural Development program are responsible for making lower interest-rate loans available to rural youth, rural youth organizations, and other qualified beginning farmers and ranchers. The division's Marketing Program is responsible for identifying major need and priorities by coordinating agricultural product development through improvement of direct markets from producer to consumer. The division, through the Alfalfa Seed Act, is responsible for improving the culture and production of and market development for alfalfa seed grown in Montana. Statewide agricultural statistics and projections are developed through a Federal/State cooperative agreement administered through the division, which are made available through a comprehensive agricultural statistics bulletin and grain movement summary along with other production, price, and income reports. The division's Agricultural Assistance Program is responsible for providing peer counseling, financial consulting, legal information and debt mediation assistance to Montana's financially distressed farmers and ranchers.

The Wheat Research and Marketing Unit is responsible for promoting and encouraging intensive scientific and practical research in all phases of wheat culture, production, and marketing under the guidelines and policies developed by the Wheat Research and Marketing Committee. The unit contracts with Montana State University for work in areas such as barley improvement, disease control, insect control, and cropping practices. Foreign market promotion includes U.S. Wheat Associates membership as one of thirteen partners in the Association's foreign market development efforts and also is a member and participant in the U.S. Feed Grain Council foreign market promotion of feed grains.

The Hail Insurance Unit administers the State Hail Insurance Program under guidelines and policies developed by the State Board of Hail Insurance. In 1985, Montana producers purchased 2,029 policies from the unit worth a record \$24 million in coverage against hail damage. The unit's success is evidenced by the fact that both the amount of risk coverage and number of policies purchased have remained about the same level even with the drought that has affected the state. The program insures any type of crop grown in Montana from losses caused by hail damage. The maximum rate charged is 10 percent, for standard grain crops.

**MONTANA AGRICULTURAL STATISTICS SERVICE**

P.O. BOX 4369 -- HELENA, MONTANA 59604

(406) 449-5303

**FOREWORD**

It's a fact that those with the best information usually make the best decisions. The purpose of this publication is to provide a comprehensive summary of both state and county agricultural statistics for Montana. Data users rely on this information to help them evaluate alternatives in the decision making process.

This year's issue is a continuation of a series of agricultural statistics bulletins dating back to 1946--forty years ago. The bulletin is provided free of charge to those who provide input data, but starting last year, others are charged \$5.00 per copy to help cover publication costs.

Agriculture is the most important industry in Montana. Sales from agricultural products usually represent one-third or more of the total revenue produced by Montana industries. Sales from the state's 23,800 farms and ranches contributed 1.4 billion dollars to the economy in 1985.

Low prices and reduced production due to drought have caused severe financial problems for many Montana producers in recent years. Wheat production in 1985 was the lowest since 1939!

The bulletin also includes special statistical data on grain movement, wheat utilization, and wheat and barley varieties. This information would not be available without funding support from the Montana Wheat Research and Marketing Committee.

We owe a sincere thanks to all the farmers, ranchers and agri-businessmen who voluntarily fill out questionnaires or answer phone requests to provide the basic information for this report. We also appreciate the hard work and dedication of our staff of Statisticians, support personnel, and field and telephone interviewers who are responsible for the collection and summarization of this information. A special thanks to Carol Jean Smith who had overall responsibility for bulletin layout, charts and pictures, and computer processing.

Lyle H. Pratt,
State Statistician

MONTANA CROPS & LIVESTOCK -- 1985

JANUARY: The month was generally cold with temperatures a few degrees below normal. Snowcover was very light and wind damage to winter wheat was light to moderate. **FEBRUARY:** Temperatures ranged 2 to 12 degrees below normal and precipitation was generally below to much below normal. The dry, cool weather was good for the start of calving and lambing. Winter wheat remained dormant. **MARCH:** The most part of the month temperatures were 2 to 8 degrees above normal. Precipitation was variable. Winter wheat began greening up by month's end. Calving and lambing conditions were favorable and about 65 percent was completed by the end of the month. **APRIL:** Seeding of spring crops got off to a slow start but by month's end progress was ahead of normal. Temperatures normal to above with precipitation extremely variable. Calving approached completion with 90 percent of the calves dropped while lambing and shearing were about 85 percent complete.

MAY: Generally a warm dry month with critical moisture shortages developing. Winter wheat winter-kill more than usual. Planting progress well ahead of normal and essentially complete for most crops by month's end. Pasture and range growth slow due to lack of moisture. About 80 percent of the cattle and sheep were moved to summer ranges. **JUNE:** Temperatures were generally above normal and scattered showers did little to alleviate drought conditions. Crop conditions ranged from poor to fair and crop development was ahead of normal due to the dry conditions. Grasshopper infestations were the heaviest in years. The weather was ideal for haying. Pasture and range conditions deteriorated and stockwater shortages started to develop. **JULY:** Condition of all crops continued to deteriorate as high temperatures and persistent winds aggravated the drought. Considerable acreage of grain crops cut for hay or grazed to salvage from heavy grasshopper infestations. Small grain harvest started a week to two weeks early. Forage supplies dwindled and stockwater supplies became very short in many areas. **AUGUST:** Cooler temperatures and general showers came too late to help any dryland crops, but delayed grain and hay harvest. However, by month's end harvest progress was ahead of normal and seeding of winter wheat was getting started. Stockwater supplies improved and cattle and sheep were being moved to winter grazing areas. **SEPTEMBER:** Soil moisture supplies continued to improve and by the end of the month harvest progress of most crops was generally on schedule. Sugarbeet harvest was just getting underway. Stubble fields and fall pastures were providing good grazing in many areas. **OCTOBER:** Temperatures above normal the first half of the month and generally below the last half. Harvest of all crops was essentially finished during the month. Heavy culling of cattle herds and fewer calves were being held over because of short hay and roughage supplies. **NOVEMBER:** Statewide, the month will go down as the coldest November on record. Temperatures averaged 10 to 25 degrees below normal. Generally precipitation was above normal. Winter wheat was in mostly fair to good condition going into the winter. Record cold temperatures were causing some stress on livestock. **DECEMBER:** The cold weather of November continued into the month with some moderation in temperatures by the end of the first week. The month was extremely dry over nearly all the state. Snowcover for winter wheat was generally fair to good. Cold weather increased feeding requirements for livestock resulting in larger than usual amounts of hay and roughage being used.

MONTANA'S RANK IN THE NATION'S AGRICULTURE

<u>ITEM</u>	<u>UNIT</u> (000)	<u>PERIOD OR DATE</u>	<u>RANK</u>

AGRICULTURE: MONTANA'S MOST IMPORTANT INDUSTRY

Agriculture traditionally accounts for one-third or more of the total receipts earned by Montana's primary industries. During 1985, severe drought reduced agricultural receipts to their lowest level since 1979. Mining, gas, and oil receipts were also down as was manufacturing. Tourism held steady while lumber prices and sales improved.

RELATIVE IMPORTANCE OF SELECTED MAJOR MONTANA INDUSTRIES

PERCENT OF TOTAL

MONTANA PRIMARY INDUSTRIES

INDUSTRY	BASIS	YEAR	VALUE IN THOUSANDS
Agriculture 1/	Cash Receipts	1985	\$1,427,681
Oil & Gas 2/	Value of Production	1985	869,336
Travel & Tourism 3/	Value of Receipts	1985	850,000
Mining 2/	Value of Production	1985	566,460
Lumber, Paper & Wood Products 4/	Value of Production	1985	735,000
Manufacturing 5/	Value Added	1985	600,000
TOTAL			\$5,048,477

1/ USDA--ERS (Includes Government Payments).

2/ Montana Department of Revenue.

3/ Montana Department of Commerce, Montana Promotion Division.

4/ Bureau of Business & Economic Research, University of Montana (preliminary).

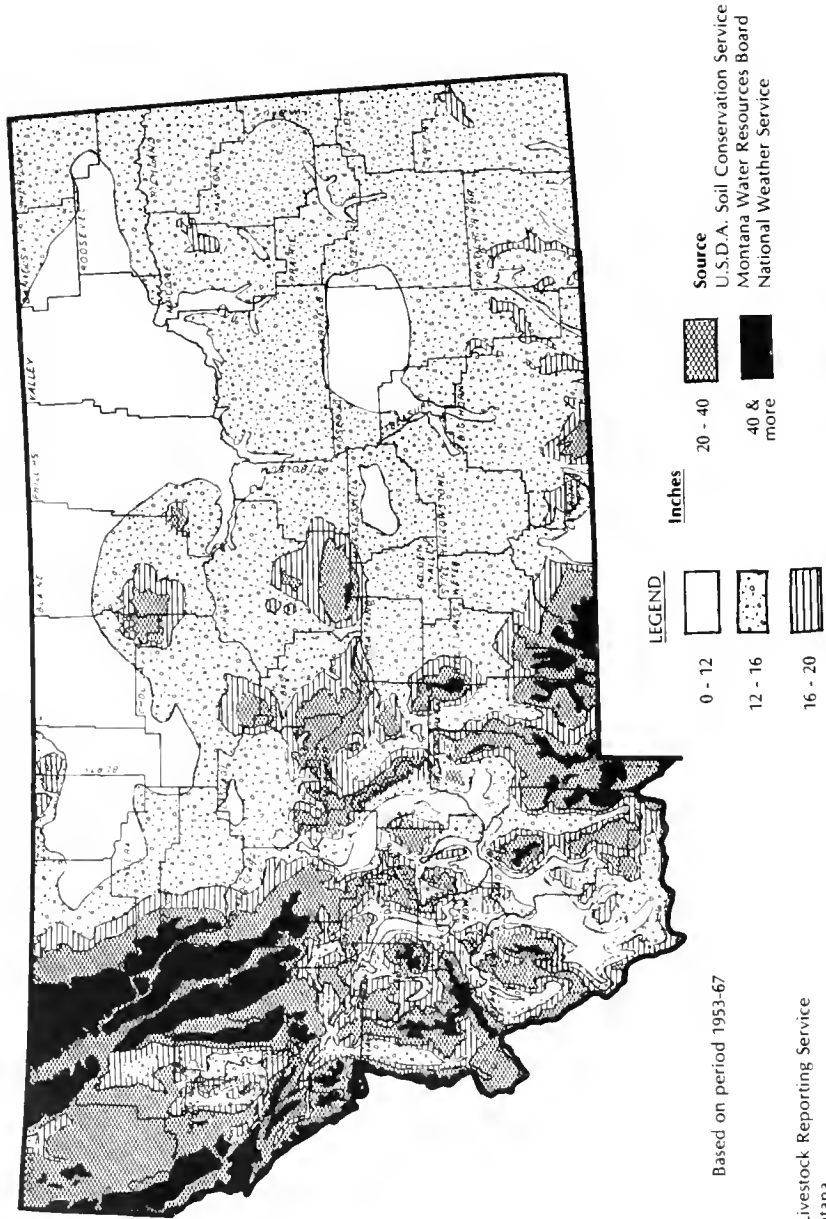

5/ Montana Department of Commerce (estimate).

AGRICULTURAL EXPORTS

The value of Montana agricultural commodities exported during the year ending September 30, 1985 totaled \$232.8 million, 55 percent less than the previous fiscal year. Wheat and wheat products account for about 83 percent of the total value of exports for the state.

Value of United States agricultural commodities exported for the year ending September 30, 1985 decreased 18 percent from the previous fiscal year. Wheat and wheat products account for about 15 percent of the total value of the national exports.

Nationally, Montana ranks 6th in revenues from the export of wheat and wheat products. North Dakota is number 1 followed by Kansas, Oklahoma, Texas, and Colorado.

ESTIMATES ISSUED BY THE MONTANA AGRICULTURAL STATISTICS SERVICE

Current estimates of the data published in this bulletin are available and may be obtained by calling the MONTANA AGRICULTURAL STATISTICS SERVICE or interested persons may be added to one or more of our three mailing lists. The three separate mailing lists are: (1) MONTANA CROP & LIVESTOCK REPORTER, a semi-monthly publication containing various crop, livestock, price and other farm data; (2) CROP WEATHER REPORT; and (3) MONTANA AGRICULTURAL STATISTICS BULLETIN. The annual charge for these publications is: MONTANA CROP & LIVESTOCK REPORTER--\$10, CROP WEATHER REPORT--\$12, and MONTANA AGRICULTURAL STATISTICS BULLETIN--\$5.00. Reporters on our surveys are not charged. An order form may be obtained by calling or writing the MONTANA AGRICULTURAL STATISTICS SERVICE, P.O. Box 4369, Helena, MT 59604. (Office--Room 398, Federal Bldg. & U.S. Courthouse, 301 S. Park Avenue, Phone: 449-5303.)

Corn Estimates by County.....	Annual	Late winter-Early spring
Cattle on Farms by County.....	Biennial	

^{1/} Pending program changes may change some publication dates. Statistics in the National program are released in Washington, D.C. and locally according to strict, predetermined dates. Various series are included in the "MONTANA CROP & LIVESTOCK REPORTER" published twice a month.

The Montana Department of Agriculture and Montana Agricultural Statistics Service find it necessary to reduce the cost of publishing and mailing reports. Beginning in 1985 this bulletin will cost \$5.00 per copy.

4,000 copies of this public document were published at an estimated cost of \$1.18 per copy for a total cost of \$4,700 which includes \$3,700 for printing and \$1,000 for distribution.
